

OPEN Candle Wraps – Satin Edge

by Sherry Titzer

<http://www.atimetostitch.com>

Satin edged wrap pieces, joined at sides with zig-zag stitch

These instructions are for the wraps with openings to see the candle glow!

Wrap 1 (front) - 4.2"H x 6.45"W Wrap 2 (back) – 4.2"H x 6.45"W

SUPPLIES:

Vilene or Aqua Magic wash away stabilizer to fit your hoop

Candle wrap fabric - 4 pieces 5" x 7" (2 pieces for lining)

Fabric for appliqué – (see text file for specific sizes/colors)

Pellon fusible fleece - 2 pieces 5" x 7"

Pellon med weight fusible interfacing - 2 pcs 5" x 7" (iron to wrong side of wrap lining fabric)

Wonder Under transfer fusing web (for wrong side of appliques) Remove paper backing before using fabric in design.

TIP: STARCH ALL FABRIC UNTIL NICE & CRISP FOR EASIER TRIMMING!

1. Sew initial placement outline on vilene only.

2. Remove hoop, center fleece over outline. Tape in place at corners, put hoop on machine.

3. Next color stop tacks fleece down, stitches main outline and openings. Trim the vilene from inside the outline.

4. Remove hoop and trim the vilene from inside the main outline up to the openings. Vilene must stay inside opening(s) outlines to support the satin stitched edges!

5. Center fabric over outline on both sides of hoop. Interfaced fabric on back. Tape in place, replace hoop.

6. Next color stop tacks both pieces of fabric down, stitches opening outlines again.

7. Remove hoop, trim fabric/fleece from inside openings on both sides of hoop. Leave the vilene inside the openings! Put hoop on machine.

8. Next step stitches satin edge of the openings and may stitch some designs details and appliqué outlines.

9. Finish stitching design following the instructions provided in the text files.

10. Last step stitches satin edges around wrap piece. (Use same color thread in bobbin as the satin edge!)

11. Trim design from stabilizer. Run warm wet rag along edge to dissolve remaining stabilizer. Let dry.

12. With side seams touching, stitch together with zig-zag stitch on your machine using same color thread as satin stitched edge. (Settings: 1.0 stitch length, 3.5 stitch width)

13. Next, fold wrap (right sides facing), stitch other side with same zig-zag stitch settings but let stitches drop off edge so when wrap is turned right side out, the sides meet without overlapping. Or stitch last side together by hand!

14. Finished picture of wrap with openings! Make matching mat using the Candle Mat PDF file provided on the HOW TO page on my website.

Mainstays jar candle from Walmart

(Label on bottom of jar)

These candle wraps were designed to fit 20 oz jar candles (or shorter jars with the same jar circumference). The candle jar shown above was purchased at Wal-Mart. **Note: For these candle sets (joined at sides with zig-zag stitch) be sure to take a finished wrap along with you to purchase the jar candles. We have discovered the jar circumference varies in size and some jars may be too big to fit!!**
